Amirhossein Nassergivchi

Solution Architect & Senior Software Developer
Richmond Hill, ON, Canada
amir.nasser@gmail.com | 416-931-5050 | amirnasser.ca

Professional Summary

Innovative and results-driven Solution Architect and Senior Software Developer with over 15 years of experience designing and building secure, high-performance software solutions across web, cloud, and hybrid environments. Adept at leading cross-functional teams, mentoring developers, and delivering scalable systems for enterprise clients. Passionate about blending intuitive design with robust architecture to create software that lasts.

Education

Eastern Mediterranean University

- Master of Information Systems
- Bachelor of Science in Information Technology
  Full Academic Scholarship Recipient

Technical Skills

Software Architecture & Development

- AI & Automation: AI-powered feature development, model integration, workflow automation
- Languages & Frameworks: C#, PHP, .NET Framework, .NET Core , ASP.NET, MVC, Laravel, Symphony, Entity Framework, Enterprise Library, Telerik Components, KendoUI, Composer
- Front-End: JavaScript, TypeScript, Angular, Vue.js, Blazor, HTML5, CSS, KnockOutJs
- CMS & Customization: WordPress development, PHP customization, WooCommerce integration
- System Design: API design, routing, caching, templating, security, Redis (in-memory caching, pub/sub, session storage)
- Tools & Platforms: Git, JIRA, Azure DevOps, Azure Portal, Google Cloud Platform (GCP), AWS, Grafana
- Cloud & Containerization: Docker, Docker Swarm, Kubernetes
- Architecture: Microservices architecture, API design, routing, caching, templating, security, distributed systems, Kong API Gateway
- Deployment & Optimization: CI/CD pipelines, performance tuning, automated deployment workflows
- Web Servers & Reverse Proxies: Nginx, Apache, IIS (reverse proxying, load balancing, SSL/TLS, caching, performance tuning, security hardening)

Database Management

- Microsoft SQL Server, MySQL, PostgreSQL, Oracle, MongoDB, Firebird
- Stored procedures, views, functions, optimization
- Relational & NoSQL database design
- Data governance & compliance best practices

Business Intelligence & Analytics

- BI tools integration: Looker, Tableau, Power BI
- Data modeling, reporting pipelines, dashboard development

API Gateway & Service Mesh

- Kong (routing, load balancing, JWT/OAuth2 auth, rate limiting, plugin configuration, observability, microservices integration)

Web Servers & Reverse Proxies

- Nginx, Apache, IIS (reverse proxying, load balancing, SSL/TLS, caching, performance tuning, security hardening)

System Administration

- Operating Systems: CentOS, Debian, Ubuntu, Windows Server
- Server Management: Dedicated Linux/Windows servers, network configuration, performance tuning, security hardening, backup strategies
- Server Management: Dedicated Linux and Windows servers, performance tuning, and security hardening
- Infrastructure: LAN/WAN configuration, firewall rules, VLANs, DNS/DHCP, remote access, monitoring, and uptime management

---

WebNeat (Consulting Firm)

Founder & Senior Solution Architect / Consultant 2024-Now

- Providing consulting services in software architecture, cloud modernization, AI-powered development, and enterprise system integration.
- Designing and delivering scalable, secure solutions for clients across web, cloud, and hybrid environments.
- Leading end to end development of custom applications using .NET, PHP, JavaScript frameworks, and modern cloud platforms (Azure, AWS, GCP).
- Implementing microservices architectures, CI/CD pipelines, Kubernetes deployments, and containerized workflows.
- Advising organizations on data governance, compliance, and modernization of legacy systems.
- Integrating BI tools (Looker, Tableau, Power BI) into operational workflows to support data driven decision making.
- Managing on premise infrastructure, including ESXi virtualization, networking, storage, and security hardening.
- Collaborating with business stakeholders to translate requirements into technical roadmaps and deliverables.

Whitecap Canada

Solution Architect - Senior Software Developer 2010-2024

- Collaborated with backend teams to design and implement tools that streamlined **application deployment and testing**.
- Developed utilities that improved the security and efficiency of day-to-day deployments to backend servers.

- Built solutions to test and validate WCF and REST services, ensuring reliability and faster troubleshooting.
- Contributed to improving team workflows by creating automation scripts and deployment aids that reduced manual effort.
- Delivered scalable solutions for a diverse portfolio of clients, including:
- Woodbine Entertainment Group (*HPIBet.com, Woodbine.com*)
- Miele Canada (*Miele.ca*)
- Park'N Fly (*Parknfly.ca*)
- Caplans (*Caplans.ca*)
- Travel Insurance Office (*travelinsuranceoffice.com*)
- Ontario Sires Stakes (*oss.ontariosiresstakes.com*)
- RiskCheck (*riskcheckinc.com*)
- Second Harvest (*foodrescue.ca*)
- Ontario Thoroughbred Improvement Program (*tip.ontarioracing.com*)
- *…and additional enterprise and nonprofit clients across Canada*

Hub International
Software Developer 2009-2010

- Customized an open-source PHP application (named Orange HRM) to align with HR requirements and organizational workflows.
- Adapted and extended system functionality to improve usability, compliance, and efficiency for HR operations.
- Collaborated with stakeholders to gather requirements and deliver tailored solutions that supported day-to-day HR processes.

Bizinabz
Web Developer 11/2008 – 01/2009

Designed and documented workflow and system architect based on business requirements with UML.

- Designed database tables, query optimization, stored procedure, Triggers on MySQL 5.
- Developed PHP modules/classes based on MVC and PEAR framework.
- Developed URL rewriting to implement search engine friendly URLs on IIS.
- Programmed client side RIA and AJAX scripts with jQuery.
- Designed browser friendly web interface based on XHTML 1.1, CSS 2, and SMARTY templates.
- Developed Web Service API with C# for administration software.

Bobac CFS – Alameda, CA
Intermediate Developer 10/2007– 11/2008

Description: Bobac CFS is a warehouse, trucking, Custom Examination, FDA and USDA Examination that can handle more than 100 container at anytime. Purpose of the project was to build an ERP/CRM/Accounting application.

- Developed C# windows program
- Implement PHP Web-Service with SOAP
- Re-designed database structure to improve integrity, reliability and support transaction on MySQL 5 InnoDB engine.
- Develop PHP Web Service for invoicing and communicating with customers.
- Designed and developed new reports by using Crystal Report 2008.

- Languages/Technology: C#, PHP, NuSOAP Web Service, .Net Component, CoreLab MySQL

e-Rational Solutions – Las Vegas, NV, US
Intermediate Developer 11/2005 - 9/2007
Description: Integration is one of the fastest growing semiconductor companies in Silicon Valley. Integration designs and delivers tested wafers and packaged ICs for RF, Infrared, Modem, and Power Management applications for systems from notebook computers to communications networks.
Analyze client's business processes; develop requirement definition to meet current and future needs.

- Architect solution, designed database, manages development teams, supervised solution implementation at client's site.
- Designed and coded PHP Data Layer modules and PHP Business Objects.
- Coded PHP security modules and classes with supporting CAPTCHA images.
- Coded PHP Mass Mailing class
- Coded RSS Generator

Projects & Tools

Developed internal tools to streamline deployment and testing processes, improving efficiency, security, and reliability of backend systems.

- **EasyCopy** – Streamlined file duplication and deployment
- **WebDeploy** – Automated web deployment workflows
- **RestAndWcfServiceTester** – Simplified API and service testing

Leadership & Collaboration

- Mentored junior developers and led agile teams
- Fostered cross-functional collaboration with design, UX, and QA
- Advocated for continuous learning and workflow improvement

Languages

- English (Fluent)
- Farsi

Certifications

- **Microsoft ASP.NET Development Certification** – Validated expertise in building and deploying web applications using ASP.NET framework.
- **Kentico CRM Certification** – Demonstrated proficiency in managing customer relationship workflows and customizing Kentico CMS/CRM solutions.
- **Python Certification** – Mastering the Essentials (Scaler Academy) – Comprehensive training in Python fundamentals, scripting, and application development.
